

The Edge Report — Tracking Sheet

Week of August 20 — August 26, 2026 · 108 games rated · ratings built from 5,939 completed games

This is a record sheet for a paper test, not a slate of wagers. Fill in the result column as games finish. After 200+ rows you will have a real answer about whether these picks are worth money — and it will have cost nothing to find out.

The **Chance** column is not the model's raw confidence. The model is overconfident below its top tier (it says 82% and delivers 74%), so each pick is shown at the rate its tier has actually hit across 1,111 graded picks.

Picks, strongest first

Date	Matchup	Pick	Model	Chance	Won?	Notes
Sun 08/23	Seattle Storm @ Dallas Wings	Dallas Wings	88%	85%		
Thu 08/20	Connecticut Sun @ Las Vegas Aces	Las Vegas Aces	88%	85%

How to run the test

1. Print this sheet, or keep it open, at the start of the week.

2. As each game finishes, mark **Won?** with Y or N. Do not skip losses.
3. At week's end, count: how many of the 85%+ rows won? the 70% rows?
4. Compare each group against its Chance column. That is the whole test.
5. Keep sheets. A verdict needs 200+ rows, not one week.

What this sheet cannot tell you

Whether the picks make money. Accuracy and profit are different questions: graded against real closing prices, these picks returned –5.5% per bet, because the market prices them at least as well as the model does. To test profitability you would also have to record the odds offered at the time — there is room in Notes.

Not betting advice. This sheet exists so the model can be judged on evidence rather than on a hunch.
