

The Edge Report — Tracking Sheet

Week of August 21 – August 30, 2026 · 175 games rated · ratings built from 5,945 completed games

This is a record sheet for a paper test, not a slate of wagers. Fill in the result column as games finish. After 200+ rows you will have a real answer about whether these picks are worth money — and it will have cost nothing to find out.

The **Chance** column is not the model's raw confidence. The model is overconfident below its top tier (it says 82% and delivers 74%), so each pick is shown at the rate its tier has actually hit across 1,111 graded picks.

How to run the test

1. Print this sheet, or keep it open, at the start of the week.
2. As each game finishes, mark **Won?** with Y or N. Do not skip losses.
3. Record the odds offered in **Notes** if you can — without them this measures accuracy only, never profit.
4. At week's end, compare each confidence group against its Chance column. That is the whole test.
5. Keep sheets. A verdict needs 200+ rows, not one week.

What this sheet cannot tell you: whether the picks make money. Accuracy and profit are different questions — graded against real prices, these picks returned –5.5% per bet, because the market prices them at least as well as the model does.

Not betting advice. This sheet exists so the model can be judged on evidence rather than on a hunch.

Picks, strongest first

Date	Matchup	Pick	Model	Chance	Won?	Notes
Fri 08/28	Connecticut Sun @ Indiana Fever	Indiana Fever	93%	85%
